<https://www.linkedin.com/in/davitkhachatryan11/>

PROFILE

Dynamic and results-oriented Full Stack Developer with over 4 years of hands-on experience in both start-up and established environments. Proficient in all stages of the web development lifecycle, from concept and design through implementation, testing, and deployment.

Ability to work both with teams and individually.

With expertise spanning both frontend and backend development, I am adept at leveraging the latest technologies to build robust and scalable solutions that meet and exceed client expectations. Whether collaborating with cross-functional teams or tackling solo projects, I bring a proactive and solutions-oriented approach to every task, ensuring efficient delivery and superior quality.

SKILLS

Proficiency in Typescript, JavaScript, React, Redux, Next.js, HTML, CSS and other relevant frameworks

Experience with Node.js, Nest.js, MongoDB, Express.js, Vue.js, Gatsby.js, Angular, React Native

Strong understanding of agile development methodologies (scrum, kanban)

Proficiency with version control systems like Git, and knowledge of development workflows and processes

Understanding of Blockchain Technology

EXPERIENCE

Software Engineer Feb 2024 — Present
Optimum Partners — Yerevan

- Working with US-based clients in an international setting.
- Taking part in client meetings and demos to demonstrate product features and gain insights.
- Participating in sprint planning, sprint reviews, daily stand-ups, and other Agile rituals.
- I am collaborating with Product Owners, Scrum Masters, and team members to prioritize tasks and deliver features.
- I am working with geographically diverse teams and stakeholders.
- I'm working on international newspaper's website and it's providing tools.

Software Developer Sep 2021 — Feb 2024
Solicy — Yerevan

- Developing and maintaining web and mobile applications using JavaScript, and other relevant programming languages and frameworks.
- Implementing responsive design and cross-browser compatibility ensures that applications work effectively on all devices and platforms.
- Troubleshooting and debugging frontend code to ensure it works properly across different devices and platforms.
- Some big projects I've worked on are the back-end and front-end parts of the Fintech project designed for investing with tokens and coins, a document generator project that used the OpenAI API, an online travel agency's website, and a state-of-the-art social network platform designed to deliver joy on demand.

Full-Stack Developer Jun 2019 — Jan 2023
Freelance — Yerevan

- Involved in project plan meetings with clients, and team members to analyze business requirements.
- Building, testing, and deploying software applications and features.
- Some big projects I've worked on are the front-end parts of the Web3 project designed for revolutionizing the real estate investment landscape: leveraged blockchain, cryptocurrency, and NFT technologies, Fintech project based on alpha vantage API and Yahoo finance API, working on algorithms that do calculations for best investment projects. Also, I created an AI Chat app based on openAI API, which is for education industry.

EDUCATION

Bachelor of Information Security Sep 2015 — May 2021
Yerevan State University — Yerevan
